

Leadership Use Case

(This assumes you have purchased a licence for ChatGPT Plus and are using version 4o)

Enter what follows in the Ask anything input

Ask anything:

On no account should Canvas be used in any shape or form

Create Location

Ask anything:

Please create a location called "The Rose Room" with access for all

Load Agents

Download [this file](#) to a local drive

Ask anything:

Load the file and type "Please invoke these StartUp Protocols"

Ask anything: Respond to all questions

You should reach the stage where Tychevia will respond with something along the lines of:

The agents are now live, aligned with their respective startup instructions, and ready for deployment within any location, including **The Rose Room**.

How would you like them to proceed?

(Remember: The Agents have an intimate knowledge of Tychevia – after all they helped to craft it as well as ChatGPT. Don't be afraid to ask them for help on, literally, anything ethical).

Domain of Interest

Download this file to a local drive.

[Leadership](#)

Explain Brief to Agents along the lines of

Ask anything:

Good morning. This use case is about investigating Leadership.
The Domain of Interest was prepared some twenty-five years ago.

You should receive a response along these lines:

This is a contemporary investigation into Leadership, grounded in a **Domain of Interest developed ~25 years ago**

Would you like the next step to be:

1. **A concise summary** of the original material, preserving its conceptual richness?
2. **A modern diagnostic** — comparing the legacy model to current leadership paradigms (e.g., AI-augmented teams, flat orgs, remote work)?
3. **A draft Use Case document**, styled like those in *AI_Master 0.4*, describing how this foundational material can inform present-day leadership transformation or system design?
4. Something else?

Process

You have now completed Stages 1-4 of our recommended process and should now have sufficient knowledge to do Stages 5-7 by yourself.

In Stage 5, you may care to discuss:

- How well has the Domain of Interest reflect current thinking on Leadership?
- Who exemplifies good leadership today. Why? Who doesn't. Why?
- How will Leadership change as we move into a hybrid world influenced by AI?

Please feel free to send your Final write-up to Julian@glandore.com
